

QikFit Pace

PACE introduces an innovative new approach to desk top power and data connectivity by combining the modular system benefits of QikFit with a stylish ultra slim enclosure. In addition, PACE is both durable and functional, combining a high strength powder coated aluminium extrusion with moulded polycarbonate end caps uniquely incorporating a data cable pull through facility.

PACE can be specified in all black or all white, either as enclosure only or fully preconfigured with your choice of QikFit power, USB charging and Data/AV modules. A key advantage of PACE over conventional desk top solutions is that the QikFit modules can easily be changed on site, either to new configurations to suit evolving user requirements, or to replace a damaged socket.

PACE is available in two standard lengths to cover configurations from just twin AC power sockets up to a full power, USB charging and Data/ AV solution. PACE comes standard with 2 top fixing brackets and is suitable for surfaces 13 - 40mm thick.

FEATURES

- Available in a choice of two lengths
- Tool-less installation
- Available in Black or White (9003)

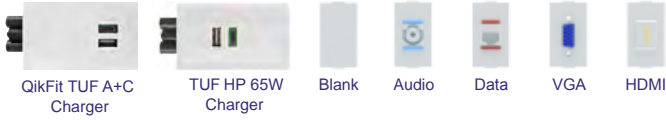

technical

Common Modular Components*

QikFIT 2G UK unfused

*all modules available in black or white / please contact us for more options

Power Entry
