QikFit Power / Data Modules

The core component of the QikFit modular system is the power socket module, available in UK, Schuko, French Belgian, Swiss and Australian all with safety shutters as standard.

All QikFit power modules have industry standard GST18i3 power in and power out connectors with locking clips as standard and are available with either white or black socket fascias.
Simply connect a suitable power cable to a QikFit power module for an economical double or triple socket unit for below desk top IT equipment. Clip together two or more modules for additional sockets, or daisy chain modules with GST18i3 interconnect leads.

QikFit power modules can also be integrated with QikFit USB charging and Data/AV modules for a complete connectivity solution.

QikFIT power, data/AV modules fit OE power rails and table/ socket boxes,
